

About Us

Veratrak is transforming the way that pharmaceutical supply chain companies work together to deliver high quality and affordable medicine to patients.

We have an amazingly talented team building a blockchain based solution for managing documentation sharing and collaboration in the pharmaceutical supply chain. We have funding from some of Europe's premier investors and recently won the University of Oxford "Innovation of the Year" award, as well as, the Oxford Seed Fund.

Quality Analyst

Description

Our customers use our software for mission critical processes ensuring that medicine is high quality and is efficiently delivered to patients. The Quality Analyst ensures that our software meets their high standards. They are also responsible for understanding the guidelines and regulations that impact on Veratrak and our customers, and ensuring that we comply with these.

Responsibilities include:

- Designing and implementing tests, debugging and defining corrective actions.
- Reviewing system requirements and tracking quality assurance metrics (e.g. defect densities and open defect counts).
- Conducting tests before product launches to ensure software runs smoothly and meets client needs, while being cost-effective.
- Documenting these quality processes in line with the relevant guidelines.
- Assisting with customer support.
- Working with engineering leads to define a roadmap for automating quality and compliance activities.
- Ultimately, you should monitor all stages of software development to identify and resolve system malfunctions to meet quality standards.

As our team member you will have the chance to touch multiple aspects of the business across different streams of work, and all Veratrak team members have a voice in decision making, deciding on the short and long term strategy of the organisation.

About You

- STEM background or technical experience.
- Strong technical ability and understanding and an aptitude and desire to learn and develop new skills.
- Good written and communication skills.
- Solid organizational skills including attention to detail and multi-tasking skills.
- A strong ability to work in a team with past examples of successful teamwork.
- Not afraid of taking on responsibility!

Preferred but not mandatory:

- Experience in a technical/software role.
- Programming or software development experience.
- Experience in supply chain management or the pharmaceutical industry.
- Quality Assurance/Test Automation experience.

What We Offer

Career growth by working in a quick moving environment with exposure to multiple aspects of the organisation. You will get a glimpse into the pharmaceutical world and have the opportunity to improve healthcare by increasing the security and efficiency of the medical supply processes.

Develop your soft skills working in a dynamic team in an agile environment, and technical skills by developing an in depth understanding of our technology and automated testing skills as well as a detailed understanding of the guidelines and regulations of the pharmaceutical industry.

A fantastic opportunity to be part of the team at a really exciting time in a rapidly growing startup.

As an organisation, we strongly believe in sharing in our successes. As such, Veratrak employees receive equity in the company as part of their total compensation.

How to Apply

This is a full time position based in London.
